

## UNIMAC

UniMac<sup>®</sup>, a leading provider of on-premises laundry equipment, offers a 55-pound tumble dryer equipped with OPTidry<sup>™</sup> over-dry-prevention technology. Reducing labor, energy and linen-replacement costs associated with over-drying, OPTidry accurately senses dryness levels throughout an entire load. The machine will automatically

shut off once desired dryness levels have been reached, increasing throughput and energy savings. In addition, linens experience 31 percent less fiber loss when over-drying is eliminated.
