**UniMac Introduces UniLinc™
Control for Tumblers and OPTidry™
Over-dry Prevention Technology**

UniMac, a leading provider in on-premises laundry equipment, offers laundry managers its UniLinc™ control for tumblers and its advanced Over-dry Prevention Technology, OPTidry™.

UniMac is the first manufacturer to offer the same networked control for washer-extractors and tumblers.

Being able to measure the laundry's performance is a critical aspect of improving it. With UniLinc, laundry managers are able to stay better connected to their laundry with features like service history logging, error alerts, quick view reports and operational baselines.

UniLinc offers options such as Head Start, which can help save several hours of labor a week by allowing machines to be loaded with linen at the end of the day and programmed to start an hour before employees are scheduled the following day. It also includes a real-time dock, maintenance reminders, a single display for both machines and monitoring of error codes and idle time to assist managers in keeping their laundry running at optimal efficiency.

OPTidry Over-dry Prevention Technology helps alleviate the increased utility and labor expenses associated with over-drying. OPTidry automatically stops the tumbler once the ideal level of dryness is reached. The result is unmatched levels of accuracy, reduced drying time per load and a better return on investment.

In a survey of commercial laundry distributors and laundry managers, 79 percent believe on-premises laundries over-dry by more than eight minutes. If these eight minutes were eliminated, annual savings can be as much as \$883 in utilities and nearly \$5,000 in labor. Also, the linens experience 31 percent less fiber loss when over-drying is eliminated.

When machines are equipped with UniLinc and OPTidry, laundry managers reap the benefits of unmatched efficiency and drying accuracy.

4,000 POUNDS
OF LAUNDRY.

300 RESERVATIONS.

ONE HOUR
UNTIL CHECK-IN.

Serious about laundry.

Never fear the ring of the reception desk bell again. With UniMac, you'll be ready for whatever tourists, business types or glee clubs come walking through that door. High-capacity. High-speed. High-performance. That's UniMac. And with the lowest cost of ownership in the market, you'll be able to finish your laundry on time and on budget. Ding! Your room is ready. To learn more, visit UniMac.com or call us at 1-800-587-5458.
